CASE STUDY NAME

DUST EXTRACTION IN A WOOD-WORKING SHOP

Case Study Facts

Products:	AC-203 Filter unit KAB-63 Filter unit Ducting pipes	Process:	CNC working centers For wood processing

Customer: KBS - Turkey

Requirements & Challenges

KBS Company was purchasing a new, high-speed CNC controlled woodworking machine for its high technology wood working shop. There was also an old manual type wood cutting lathe. The equipment were installed in different halls in the wood working shop. For each machine, there was a need for a strong extraction at the outlet and thereafter an effective filtration solution.

SOLUTION

VANTERM installed 2 separate dust collectors: 1 pcs. X AC-203 filter unit for the high-speed CNC work center, and 1pcs. X KAB-63 filter unit for the manual type cutting lathe. The dust problem is solved successfully with these dust collectors.
